

# Additive Solutions for VOC-Compliant Architectural Paints

## Dispersing & Wetting Agents

**CLIQSPERSE® 172** - dispersant for matte / semigloss paints excellent for highly filled low viscous inorganic slurries

**CLIQSPERSE® 130** - highly efficient polymeric dispersant for all paints & coatings; efficient with all pigment types

**CLIQSPERSE® 124** - additive to improve pigment wetting and stability to maximize tinting strength & color compatibility

---

## Rheological Additives

**CLIQFLOW® 602** - low shear clay based thickener to control storage stability and sag resistance in matte / semigloss paints

**CLIQFLOW® 660 VR** - mid shear Krebs-Stormer associative thickener to adjust mid shear viscosity and low shear viscosity

**CLIQFLOW® 690** - very efficient high shear ICI thickener to control flow, leveling and improves hiding power and brush drag

---

## Defoamer

**CLIQSMART® 111** - biobased polymeric defoamer for mid/high pvc paints; outstanding performance to mineral-oil based defoamer
