

EPS® 2210

KEEPING WHITE ROOFS WHITE LONGER

EPS® 2210 is an acrylic emulsion designed for use in elastomeric roof and wall coatings. Coatings formulated with EPS® 2210 are capable of conforming to ASTM D6083 Type II standards while still providing excellent asphalt bleed-through and dirt pickup resistance. EPS 2210 is capable of conforming to ASTM D6083 Type II standards.

BENEFITS:

Provides asphalt bleed-through and dirt pickup resistance

Offers excellent weatherability

Imparts a great balance of tensile and elongation properties

Enables adhesion to a variety of roofing substrates
