

# Dow Prepolymers for Industrial Coatings

Supporting flexible formulation needs in industrial coating systems

## About Dow's Prepolymer Solutions

Dow offers prepolymers that can serve as intermediate products for incorporating additives and enabling a one-component formulation, or as one part of a two-component solution with optional additive inclusion. These prepolymers are best suited for use in flexible industrial coatings as-is, depending on your formulation design.

As a distributor of Dow Polyurethanes, **Ravago Chemicals North America** provides access to a focused portfolio of prepolymers that can support coating system development. These materials are selected for their compatibility in applications where flexibility, durability, and formulation efficiency are important considerations.

## Suggested Prepolymers

- ISONATE™ 181
- VORASTAR™ HB 6724
- HYPERLAST™ LP 5608
- HYPERLAST™ LE 5006
- HYPERLAST™ LP 5601

## Why Choose Us

- ✓ Supportive resources to assist with product selection for application-specific needs
- ✓ Access to Dow's portfolio of established prepolymer technologies
- ✓ Inventory availability supported by regional warehousing and established supply channels
- ✓ Technical documentation and specification resources
- ✓ Collaboration with your team to align material selection with formulation goals
